

XM Radio is allowing me to continue to listen to radio. I get instant weather and traffic for my area and, it is the correct information. Please totally reject any petition to limit XM's expansion of a great service including NAB's petition 04-160 and give support to XM radio, it is a fine addition to broadcasting. Furthermore, in a recent trip across the country I was able to get the traffic and weather in all of the area's I visited instantly and without any distortion to the signal.
